

GigaCorp Customer Support Manual

Official Frequently Asked Questions & Operational Guidelines

Section 1: Introduction to GigaCorp

Welcome to the GigaCorp Customer Support Manual. GigaCorp is a leading innovator in consumer electronics, smart home ecosystems, and high-performance technical gadgets. Our mission is to seamlessly integrate tech into daily life, backed by world-class support services. This manual acts as our official source of truth for customer support responses, policy interpretations, and hardware troubleshooting guidelines.

Section 1.1: Core Service Boundaries

GigaCorp provides customer support strictly for official GigaCorp hardware, software configurations, and subscription services. We support GigaPhone, GigaBook, GigaHome smart hubs, and GigaCare insurance plans. Support agents must never provide assistance for non-GigaCorp applications, custom operating systems, third-party accessories, or general internet questions. If a query falls outside our service boundaries, agents must politely decline and direct the user to their respective service provider.

Section 2: Shipping & Delivery Policies

GigaCorp ships products globally from multiple fulfillment centers to ensure rapid transit. All orders are processed within 24 business hours. Order cancellation is only possible before the item is handed over to the courier.

Section 2.1: Shipping Times & Methods

GigaCorp offers three primary shipping speeds:

- Standard Shipping: Delivered in 3 to 5 business days.
- Express Shipping: Delivered in 1 to 2 business days.
- International Shipping: Delivered in 7 to 14 business days, depending on custom clearance times in the destination country.

Section 2.2: Shipping Rates

- Standard Shipping is free for all orders totaling \$50 or more. For orders below \$50, a flat standard rate of \$4.99 applies.
- Express Shipping is available for a flat rate of \$14.99 on all orders regardless of value.
- International shipping rates are calculated dynamically at checkout based on package weight and destination zone.

Section 2.3: Order Tracking & Issues

A tracking link is automatically emailed to the customer once the order is shipped. If a shipment is marked as delivered but the customer cannot locate it, they must contact customer support within 48 hours. GigaCorp will initiate an investigation with the courier, which takes up to 3 business days, before approving a replacement or refund.

Section 3: Return & Refund Policies

At GigaCorp, we strive to build quality products, but we understand that customer needs can change. This section outlines how support staff should manage refund requests, item exchanges, and warranty claims.

Section 3.1: Return Window & Conditions

Customers can return any GigaCorp product within 30 calendar days from the delivery date. To be eligible for a full refund, items must be in brand-new condition, containing all original packaging, manuals, accessories, and promotional freebies. Products showing signs of accidental damage, heavy wear, or user modification will not be eligible for returns.

Section 3.2: Return Shipping Fees

- Defective Items: If a product is verified defective on arrival or breaks under normal use within the warranty, GigaCorp provides a prepaid shipping label at no cost to the customer.
- Change of Mind Returns: For standard returns where the product is functioning normally, the customer is responsible for return shipping fees. GigaCorp will deduct a flat label fee of \$5.99 from the final refund amount if the customer chooses to use our generated shipping label.

Section 3.3: Refund Processing Times

Once a returned package arrives at our quality inspection warehouse, it is inspected within 48 hours. If approved, the refund is automatically initiated. The funds will appear in the customer's account in 5 to 7 business days, depending on their bank or financial institution. GigaCorp can only issue refunds to the original payment method used.

Section 4: Billing & Subscriptions

GigaCorp provides hardware and services billed on a one-time and recurring subscription basis. Agents must handle billing queries with high security awareness.

Section 4.1: Accepted Payment Methods

We accept major credit cards (Visa, MasterCard, American Express), PayPal, Apple Pay, and Google Pay. We also accept GigaPay, our proprietary digital checkout. We do not accept personal checks, cash on delivery (COD), or wire transfers.

Section 4.2: Subscriptions & Cancellation

GigaCare Protection and GigaCloud storage plans are billed monthly. Subscriptions automatically renew each month on the original signup date. Customers can cancel their subscription at any time via the GigaCorp online account dashboard or by calling support. Cancellations take effect at the end of the current billing cycle. GigaCorp does not issue partial-month refunds or prorated credits for unused periods.

Section 4.3: Chargebacks & Payment Failures

If a recurring payment fails, GigaCorp will retry charging the card on file three times over the next 9 days. If payment is still outstanding, the subscription is suspended. In the event of a chargeback, the customer account associated with the dispute is automatically locked pending safety review by the security department.

Section 5: Account Security & Technical Support

Ensuring customer security and resolving hardware and firmware issues is vital. This section details security policies and essential troubleshooting methodologies.

Section 5.1: Password Reset Guidelines

Customers can trigger a password reset from the login screen by entering their registered email address. A secure, encrypted link is emailed and remains valid for exactly 15 minutes. Support agents can never see passwords or manually set a password for a customer. If a customer is not receiving the email, check spam folders or verify if the email matches their profile.

Section 5.2: Two-Factor Authentication (2FA)

GigaCorp strongly encourages customers to enable 2FA under Account Settings. We support SMS code delivery and TOTP authenticator apps (Google Authenticator, Duo). If a customer loses access to their 2FA device, they must present a valid government-issued ID matching their account profile before support agents can manually disable 2FA.

Section 5.3: Troubleshooting GigaDevices

When hardware or firmware errors occur on a GigaDevice (e.g. frozen display, poor connection), follow these steps: 1. Perform a Soft Reset: Hold the power button down for 10 seconds until the screen goes blank and restarts. 2. Check Firmware: Ensure the device is running the latest firmware using the GigaConnect smartphone app. 3. Factory Reset: If soft reset fails, hold the Power and Volume Down buttons simultaneously for 15 seconds. Warning: This deletes all locally saved customer configurations and resets the device to factory settings.
